Professional Summary

Computer Science undergraduate with hands-on experience in Java and Spring Boot, building REST APIs and full-stack applications with a focus on backend development and database-driven systems. Strong in OOP, DSA, and DBMS, with experience using JPA/Hibernate, MySQL, Docker, and RESTful services. AWS Certified Cloud Practitioner with experience applying AWS services in cloud-based projects.

Education

Vellore Institute of Technology — Sep 2023 – May 2027
B.Tech in Computer Science and Engineering (Cloud Computing and Automation) — *CGPA: 8.60/10*

Rankers International School — May 2023
12th, CBSE — *Percentage: 76.4%*

SICA — March 2021
10th, CBSE — *Percentage: 75.8%*

Technical Skills

Languages: Java, SQL, Python
Systems & Backend: Spring Boot, REST APIs
Testing & Quality: API Testing, JUnit, Mockito
Databases: MySQL
Cloud: AWS
Libraries & Frameworks: Spring Data JPA, Hibernate
Tools & Practices: Maven, Docker, Git, Postman, CI/CD, SDLC
Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

Projects

Sahayak AI - GitHub — Sept 2025 – Jan 2026
An AI-Powered Classroom Assistant for Indian Middle Schools — *AWS Lambda, Bedrock, DynamoDB, S3, Python*

- Automated end-to-end assignment evaluation pipeline, reducing manual grading effort by processing Google Forms/Doc submissions via **Lambda** and **Bedrock**.
- Scaled serverless architecture handling structured/unstructured responses, enabling real-time grading and feedback delivery with **DynamoDB** storage and email notifications.
- Developed an AI-driven student submission evaluation pipeline using AWS Bedrock, Lambda, S3, and DynamoDB for automated grading.

RentNest - GitHub — June 2026 – July 2026
Smart Rental Housing Platform — *Java, Spring Boot, JWT, MySQL, Docker*

- Solved fragmented rental search and **spam-prone** owner contact exposure by building RentNest, a full-stack rental platform with a **privacy-first** enquiry workflow (Pending → Accepted → Declined) using Spring Boot, JPA, and role-based Spring Security, ensuring contact details are shared only after mutual consent.
- Addressed the need for fast, flexible property discovery by implementing dynamic **multi-field search** (city, budget, BHK, furnishing) via Spring Data JPA Specifications with pagination and sorting, exposed through documented REST APIs (Swagger) and a React frontend.
- Built a layered Spring Boot backend using **Controller–Service–Repository** architecture with JWT authentication, BCrypt password hashing, centralized exception handling, and Docker Compose deployment.

Achievements & Certifications

- **AWS Certified Cloud Practitioner** - June 2026 (Score: 1000/1000)
- **Winner** – Nebula Nexus Hackathon 2025, MIT Jaipur
- **LeetCode:** Solved **250+ problems**, including **SQL 50**, covering DSA and SQL.
